

City of Cape Coral Traffic Engineering Department - Criteria for approving a sign to warn vehicular drivers of the presence of a blind, deaf or other sensory impaired child:

1. A formal written request to the City's Traffic Engineering Department from the parent or legal guardian of the child including:
 - a. A statement from the child's doctor identifying the child's diagnosed sensory impairment/limitation.
 - b. Child's date of birth.
2. Signs provided for children fourteen years of age or younger:
 - a. Requested extensions approved by City's Traffic Engineering Department on a case by case basis.
 - b. Responsibility of the parent or legal guardian to notify the City's Traffic Engineering Department when the child reaches the age of fifteen.
3. Signs installed on the street of the primary residence of the child:
 - a. Responsibility of the parent or legal guardian to notify the City's Traffic Engineering Department when the child /family relocates from the residence.
 - b. Requests may be approved for signs on additional streets if the child receives daily care in a second residence and documentation is provided to the City's Traffic Engineering Department.
4. The placement of the sign must follow good signing practices, without compromising the effectiveness of other signs or traffic control devices in the area.
