The driveway will be widened approximately 2 feet on each side. The total proposed driveway area will be approximately 845 square feet, resulting in a net increase of approximately 130 square feet of impervious surface. Installation will include proper excavation and preparation with compacted base rock and bedding sand to support the interlocking concrete pavers. Existing swale drainage will be maintained and grading will direct runoff away from the structure. No work will occur within the City right-of-way.
