1. Manufacture / Model: \_\_\_\_\_

2. Manufacturer / Model: \_\_\_\_\_

2. Manufacture / Model: \_\_\_\_\_

Permit Applications to replace only condenser(s) or only Air Handler(s) must include certification to verify that the units match AHRI Data or Accredited Laboratory, or a manufacturer's letter, or an Engineer Letter (FBCE 101.4.7). A Duct Plan will be required for any duct work. All Documents must be present at submittal, and copies will be required to be in the field for inspections.

- The a/c contractor has inspected the existing duct system and has determined the existing duct system **is sufficiently** sized and located for the proposed equipment for a functional and operational system.
- The a/c contractor has inspected the existing duct system and has determined the existing duct system **is deficient** in sizing and/or placement for the proposed equipment and will require modifications for proper performance. The owner has been advised of this item and the potential requirements to correct.
